Water

Smart

Wi-Fi/app  
enabled

Wifi/App connected heater chiller unit

Circular particle filtration with a 20 micron filter and an ozone generator

No plumbing required - Plug and Go Long

Long lasting durable tub suitable for indoors and outdoor in Artic White or Grecian Beige

## QUALITY

Our ThermaPod is the most durable cold and hot therapy pod on the market. The GRP composite material is proven to withstand extreme outdoor conditions throughout the summer in the Middle East. The hypo-allergenic anti-bacterial gel coat ensures that the product will not change colour and will be able to withstand the heavy usage. The GRP composite material also makes our ThermaPod a great insulator of cold and hot temperatures and is better than all the materials currently used on the market. To further optimise the efficiency of the ThermaPod, our shell has thermal insulation, exclusively manufactured under controlled conditions in our factory here in the UAE.

## DESIGN

ThermaPod is the only cold plunge that has a built-in seat, which is more comfortable than squatting, much more practical and a lot safer than laying down. The steps up are anti-slip and we also include a fully insulated GRP composite lid to optimise the efficiency of the system, maintaining the temperature inside the ThermaPod and protecting the water from external elements.

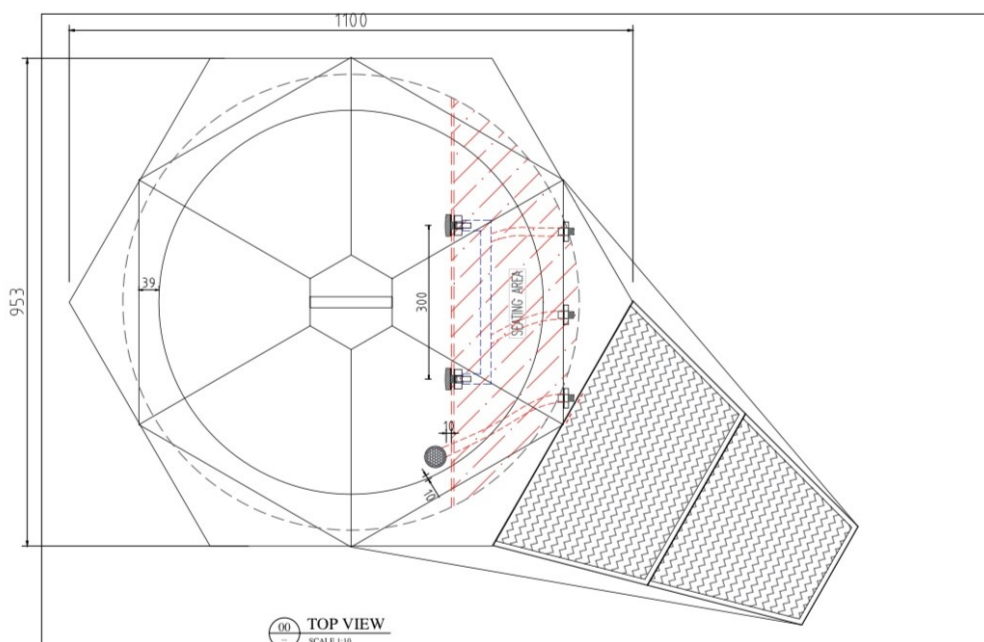

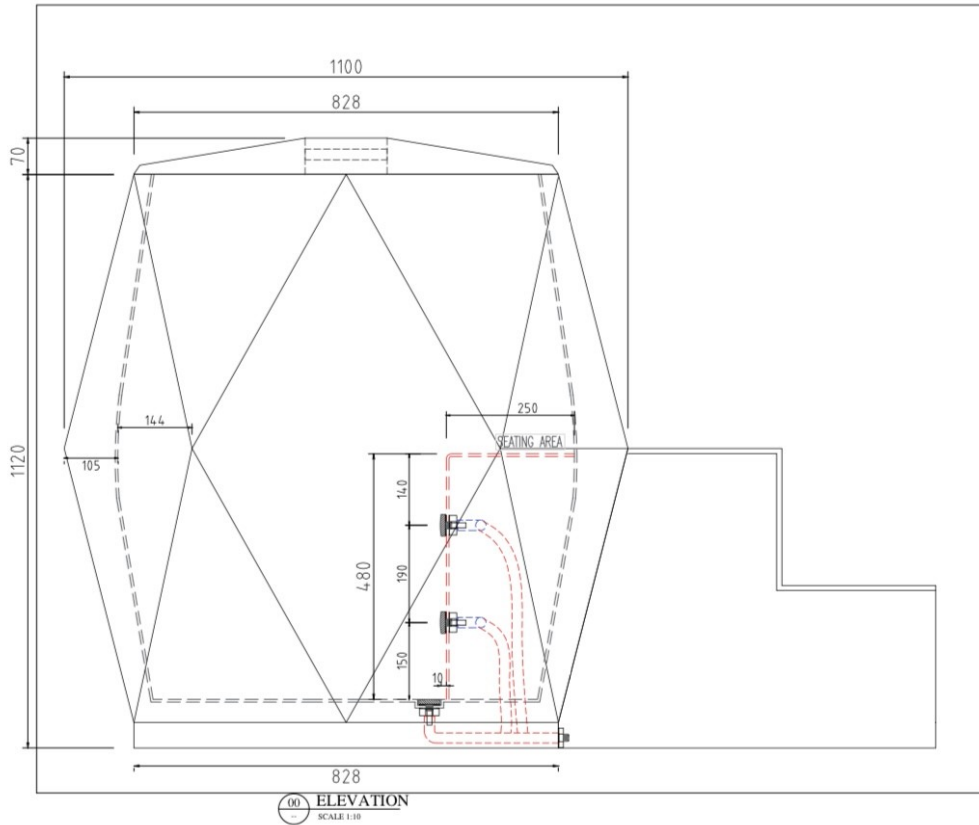

## EXPERIENCE

Our team have over 20 years' experience in the industry here in the UAE in the swimming pool sector. Our dedicated support team will always be on hand should you need us, and we offer full technical support including a 1 year warranty.

ThermaPod

**TECHNICAL  
DATA**

# ThermaPod

Heater/Chiller Technical Data	1HP Unit
Power Supply	100-127v- 60Hz
Input Power	1150W
Compressor Power	945W
Cooling Capacity	3050W
Heating Capacity	3800W
Refrigerant	R410A 360g
Water Temperature	3-42 Degrees Celsius-Adjustable
Ozone Disinfection	Ozone Generator
Circulation Pump	Built-in Self Priming System
20 Micron Water Filter	Installed External
Remote Control	Android APP, WIFI
Net Weight	42kg
Heater/Chiller Product Dimensions	54 x 40 x 55cm
Certification	CE
Water Volume and Cooling Time (From 23 to 5C- For your reference)	500 Litres @ 5 Hours
